**REFRIGERATION  
PRODUCT RANGE**

## INTRODUCTION

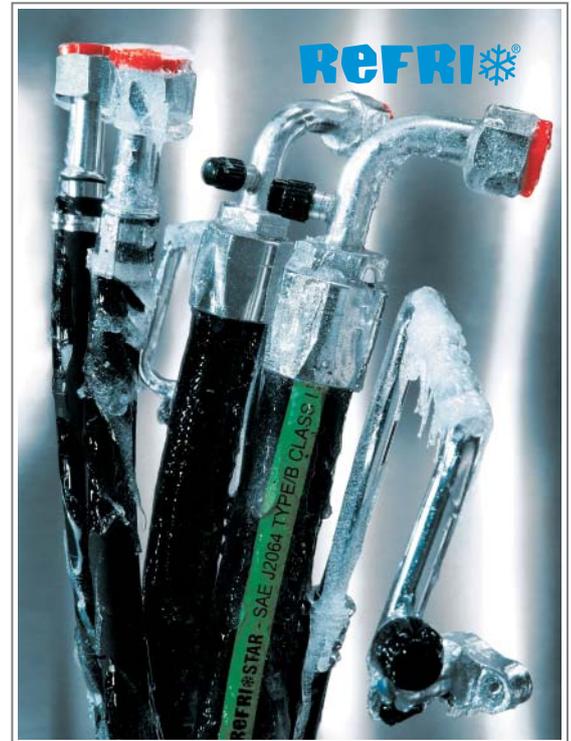

### THE OFFER

Manuli Refrigeration offer consists of reinforced rubber hoses, fittings, hose assemblies and kits.

The Refrigeration **offer** is designed specifically to satisfy the most restricted requirements aimed to the development of:

- **bus air conditioning** and **mobile refrigeration** systems for "on-road industrial vehicles"
- **air conditioning systems** applied on off-highway industrial vehicles such as: agricultural machines, earth-moving machines, forestry machines, etc.

The above systems are supplied both directly to manufacturers which need significant product volumes and through specialised distributors operating as part of the Manuli Premier Distributors Network.

### LA OFERTA

La oferta de Refrigeración consiste en las reconocidas mangueras de caucho reforzado Manuli, acoples, ensambles de mangueras y kits.

La **oferta** de Refrigeración está diseñada específicamente para satisfacer los requerimientos más estrictos enfocados al desarrollo de:

- **aire acondicionado para buses** y sistemas móviles de refrigeración para "vehículos industriales en movimiento"
- **sistemas de aire acondicionado** aplicado en vehículos industriales fuera de carretera como: máquinas para la agricultura, máquinas para mover tierra, máquinas cosechadoras, etc.

Los sistemas arriba mencionados son suministrados directamente a los fabricantes que necesitan volúmenes significativos de producto y a través de distribuidores especializados que operan como parte de la Red de Premier Distributors de Manuli.

*Bus air conditioning*  
*Aire acondicionado para buses*

*Off highway air conditioning*  
*Aire acondicionado para vehículos fuera de carretera*

*Mobile refrigeration*  
*Refrigeración móvil*

Manuli Rubber Industries, which has always been committed to offering its customers the best possible service, has developed: a special “field-attachable” fitting technology allowing a convenient mounting and disassembly operation, in particular:

- Frigodic® fitting range technology
- Reusable fitting range technology.

A crimped fitting solution, which is completely integrated on all hose lines.

The following pages describe the main steps to correctly assembly our products.

- **Refrimaster with clamp**
- **Refrimaster mounting kit**
- **Refrimaster with ferrule**
- **Refristar with reusable fittings**
- **Refristar with crimped fittings**
- **Refrifast with one-piece crimped fittings**

Please browse through the above procedures before consulting our catalogue and selecting the most suitable product for your need.

Manuli Rubber Industries, que ha estado siempre comprometida a ofrecer a sus clientes el mejor servicio posible, ha desarrollado: una tecnología especial “acorde a la necesidad” permitiendo un montaje conveniente y operación de desensamblaje, en particular:

- tecnología para el rango de acoples Frigodic®
- tecnología para el rango de acoples reusables

Un acople crimpado de o que está completamente integrado con toda la línea de mangueras.

Las siguientes páginas describen los principales pasos para ensamblar correctamente nuestros productos.

- **Refrimaster con abrazadera**
- **Refrimaster kit de montaje/ensamble**
- **Refrimaster con ferrul**
- **Refristar con acoples reusable**
- **Refristar con acoples permanentes**
- **Refrifast con racor prensado en una pieza**

Por favor examine los procedimientos antes de consultar nuestro catálogo y seleccionar el producto más conveniente para sus necesidades.

## ASSEMBLING INSTRUCTIONS - REFRIMASTER PROCEDURE

### REFRIMASTER WITH CLAMP REFRIMASTER CON ABRAZADERA

The fitting operations are extremely simple, and consist of the following procedures:

Las operaciones de acople son extremadamente simples, y consisten en los siguientes procedimientos:

- 1** Check the dimensions of the components.  
Verifique las dimensiones de los componentes.

- 2** Cut the end of the hose in a perpendicular direction, using the manual cutter.  
Corte el extremo de la manguera en una dirección perpendicular, usando el cortador manual.

- 3** Verify the end of the hose to be cut in a perpendicular direction.  
Verifique que el extremo de la manguera esté cortado en dirección perpendicular (a escuadra).

- 4** Place the double clamp on the flexible hose in such a way that the tooth of bar A comes contact with the end of the hose that has been cut.  
Coloque la abrazadera doble en la manguera flexible de tal manera que el diente de la barra A entre en contacto con el extremo de la manguera que ha sido cortado.

## ASSEMBLING INSTRUCTIONS - REFRIMASTER PROCEDURE

**5** Lubricate the end of the coupling joint with the same oil used in the air conditioning system.  
Lubrique el extremo del racor con el mismo aceite usado en el sistema de aire acondicionado.

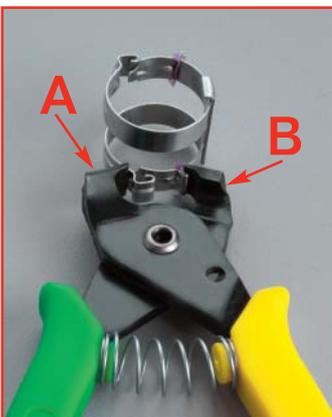

**6** Find the correct orientation and insert completely the fitting into the hose.  
Encuentre la orientación correcta e inserte completamente el acople dentro de la manguera.

**7** **A** = round nose / nariz redonda  
**B** = thin nose / nariz delgada

**8 9 10** To fit the coupling in place, position the round nose of the pliers (A) at the hook shaped end of the clamp and the thin nose (B) at the end with the hooked teeth. Tighten the double clamp until the click using the special "CLIC" open-close pliers. To disassemble, just reverse the position of the ends of the pliers on the clamp.

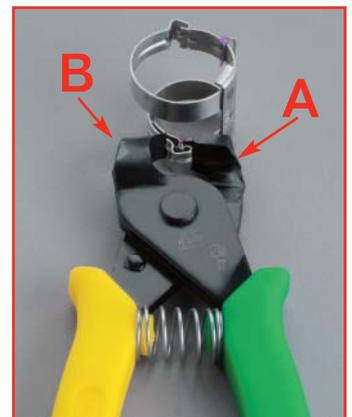

Para colocar el racor en su lugar, coloque la nariz redonda de los alicates (A) en la parte con gancho de la abrazadera y la parte delgada de la nariz (B) en el final con los dientes enganchados. Asegure la abrazadera doble hasta que cierre usando el "CLIC" especial de los alicates para abrir y cerrar. Para desensamblarlo, reverse la posición de las puntas de los alicates en la abrazadera.

**8** Closing / Cierre

**9**

**10** Opening / Apertura

**WARNING:** Do not reuse the clamp / **PRECAUCION:** No reutilice la abrazadera

## ASSEMBLING INSTRUCTIONS - REFRIMASTER PROCEDURE

**11** Verify the parallelism of the two clamps.  
Verifique el paralelismo de las dos abrazaderas.

**12** Pay attention in tightening clamp in the right way.  
Preste atención a asegurar la abrazadera de la manera correcta.

### 13 14 15 16

**WARNING:** Position correctly the clamp / **PRECAUCION:** Coloque la abrazadera correctamente

**13** Right / Correcto  
Solution with brazed insert / Solución con inserto abrazado

**14** Wrong / Incorrecto

**15** Right / Correcto **15. Right / Correcto**  
Solution with insert obtained by deformation / Solución con inserto obtenido por deformación

**16** Right / Correcto

## ASSEMBLING INSTRUCTIONS - REFRIMASTER PROCEDURE

## REFRIMASTER MOUNTING KIT

### REFRIMASTER KIT DE MONTAJE/ENSAMBLE

**1** Mounting kit.  
Kit de montaje.

**2** Manual cutter.  
Cortador manual.

**3** "CLIC" open-close pliers.  
Alicates de "CLIC" abrir-cerrar.

Manuli Rubber Industries is able to supply:

- a practical mounting kit containing all tools necessary for the correct assembly of the Frigodic<sup>®</sup> coupling
- the separate supply of hose in rolls, relevant couplings and complete kits according to customer specifications
- the packaging of all the Frigodic<sup>®</sup> in special black bags which guarantee the protection of the insert gaskets from outside light
- the possibility of servicing customers in all the most important countries (on the basis of minimum lot purchase order).

Manuli Rubber Industries tiene el agrado de suministrar:

- un práctico equipo de ensamble que contiene todas las herramientas necesarias para el ensamble correcto de los racores Frigodic<sup>®</sup>
- el suministro separado de manguera en rollos, acoples relacionados y kits completos de acuerdo con las especificaciones del cliente
- el empaque de todos los racores Frigodic<sup>®</sup> en bolsas negras especiales que garantizan la protección de las empaquetaduras de la luz exterior
- la posibilidad de servicio al cliente en todos los países más importantes (sobre la base de la orden de compra mínima).

## ASSEMBLING INSTRUCTIONS - REFRIMASTER PROCEDURE

### REFRIMASTER WITH FERRULE REFRIMASTER CON FERRUL

- 1** Check the dimensions of the components.  
Verifique las dimensiones de los componentes.

- 3** Verify the end of the hose to be cut in a perpendicular direction.  
Verifique que la punta de la manguera esté cortada en dirección perpendicular (a escuadra).

- 5** Lubricate the end of the coupling joint with the same oil used in the air conditioning system.  
Lubrique la punta del racor con el mismo aceite usado en el sistema de aire acondicionado.

- 2** Cut the end of the hose in a perpendicular direction, using the manual cutter.  
Corte la punta de la manguera en dirección perpendicular, usando el cortador manual.

- 4** Place the ferrule on the flexible hose in such a way that the tooth of the ferrule comes contact with the end of the hose that has been cut.  
Coloque el ferrul en la manguera flexible de tal manera que el diente del ferrul haga contacto con la punta de la manguera que ha sido cortada.

- 6** Find the correct orientation and insert completely the fitting into the hose.  
Encuentre la orientación correcta e inserte completamente el acople dentro de la manguera.

## ASSEMBLING INSTRUCTIONS - REFRIMASTER PROCEDURE

**7** Set up the crimping machine selecting the die set that is closed to the dimension specified. Crimp to the specified diameter (table a). Ensure the dies fully covers the ferrule length. Aliste la máquina crimpadora seleccionando el conjunto de dados que más se acerque a la dimensión especificada. Crimpe al diámetro específico (tabla a). Asegúrese que los dados cubran completamente la longitud del ferrul.

**9** Inspect the crimping dimension using a calibrated vernier. Check the diameter at the centre of the ferrule following the values in table a. Verifique la dimensión de crimpado usando un vernier calibrado. Controle el diámetro en el centro del ferrul siguiendo los valores dados en la tabla a.

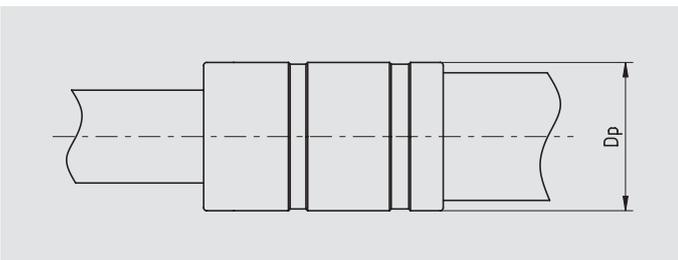

Table a / Tabla a

before / antes

after / después

Solution with insert obtained by deformation  
Solución con inserto obtenido por deformación

before / antes

after / después

Solution with brazed insert  
Solución con inserto ajustado

**8** Pay attention in coupling insert and ferrule.  
Preste atención al acoplamiento del inserto y el ferrul.

HOSE SIZE			Dp (±0,1 mm)
DN	Dash	Inch	mm
8	- 06	5/16"	16,9
10	- 08	13/32"	19,9
12	- 10	1/2"	21,8
16	- 12	5/8"	26,0

## ASSEMBLING INSTRUCTIONS - REFRISTAR PROCEDURE

### REFRISTAR WITH REUSABLE FITTINGS REFRISTAR CON ACOPLÉS REUSABLES

- 1** Check the dimensions of the components.  
Verifique las dimensiones de los componentes.

- 4** Cut the hose by using a proper sharpened disc (see fig. 4), **do not use an abrasive disc.** The hose must be square and clean cut. Avoid cutting the hose not perpendicularly or cutting the hose causing damages on its wire braid (see fig. 2, 3) for a proper cutting hose operation. Clean the hose carefully from any cutting residue.  
Corte la manguera usando un disco afilado apropiado (ver fig. 4), **no use un disco abrasivo.** La manguera debe estar cortada a escuadra y limpia. Evite cortar la manguera de manera no perpendicular o cortar la manguera causando daños en sus alambres trenzados (ver fig. 2,3) para un corte apropiado de la manguera. Limpie la manguera cuidadosamente de cualquier residuo del corte.

**2**

**3**

- 5** Secure in position the socket i.e. by using a benchvise. Screw the hose counterclockwise into the socket until it reaches the bottom. Unscrew 1/4 turn to prevent damage in screwing. Asegure en posición el socket, por ejemplo usando una prensa. Atornille la manguera en dirección de las agujas del reloj dentro del socket hasta que llegue al fondo. Destornille 1/4 de vuelta para prevenir daño.

## ASSEMBLING INSTRUCTIONS - REFRISTAR PROCEDURE

- 6** Mark the socket and the hose using an indelible felt tip pen, to verify any absence of hose rotation inside the socket during the fittings crewing. Marque el socket y la manguera usando un lapicero de felpa con tinta indeleble, para verificar que la manguera no rote dentro del socket durante el proceso de inserción del racor.

- 8** Insert the fitting into the hose. Press slightly and screw by hand turning clockwise the first threads. Then by using an appropriate spanner or a screwspanner on the hexagon, screw the fitting into the socket with a continuous and constant rotation motion and verify any absence of hose rotation inside the socket during the fitting screwing. Complete the screwing until the fitting reaches the bottom against the socket. Never overtighten. Assembling is now finished. Inserte el racor dentro de la manguera. Presione ligeramente y atornille con la mano moviendo en dirección a las agujas del reloj los primeros filamentos. Luego usando una llave de tuercas apropiada sobre el hexágono, atornille el racor dentro del socket con un movimiento de rotación continuo y constante y verifique que la manguera no haya rotado dentro del socket durante el proceso de inserción. Complete el ajuste hasta que el racor llegue al fondo contra el socket. Nunca lo apriete demasiado. El ensamble está ahora terminado.

- 7** Position the hose complete with socket i.e. by using a bench vise. Lubricate by a generous amount of oil the threading and the taper of the fitting as well as the inside of hose. **WARNING: Use the same lubricant used in the A/C system.**

Coloque la manguera completa con el socket por ejemplo usando una prensa. Lubrique con una generosa cantidad de aceite la superficie del cono y del racor así como el interior de la manguera. **PRECAUCION: Utilice el mismo lubricante usado en el sistema de aire acondicionado.**

- 9** It's acceptable to leave a margin of max 3 mm between the hexagon of the fitting and the socket. Verify alignment. Es aceptable dejar un margen de máximo 3 mm entre el hexágono del racor y el socket. Verifique la alineación.

## ASSEMBLING INSTRUCTIONS - REFRISTAR PROCEDURE

### REFRISTAR WITH CRIMPED FITTINGS REFRISTAR CON ACOPLER PERMANENTES

It is important that hose assemblies for A/C Vehicles (for instance off highway), A/C Buses and Mobile Refrigeration using Manuli Hose, Ferrules & Fittings are manufactured to the procedures below:

Es importante que los ensambles de mangueras para aire acondicionado para vehículos (por ejemplo para equipos fuera de carretera), aire acondicionado para buses y refrigeración móvil usando Mangueras, Ferrules y Acoples/racores Manuli sean fabricados según los siguientes procedimientos:

- 1** Check the dimensions of the components.  
Verifique las dimensiones de los componentes.

- 4** Cut the hose by using a proper sharpened disc (see fig. 4), **do not use an abrasive disc**. The hose must be square and clean cut. Avoid cutting the hose not perpendicularly or cutting the hose causing damages on its wire braid (see fig. 2, 3) for a proper cutting hose operation. Clean the hose carefully from any cutting residue.

Corte la manguera usando el disco afilado apropiado (ver fig. 4). **No use un disco abrasivo**. La manguera debe estar cortada a escuadra y limpia. Asegúrese que el corte de la manguera sea perpendicular y evite que el corte de la manguera cause daños en sus alambres (ver fig. 2,3) para una operación apropiada de corte de la manguera. Limpie cuidadosamente la manguera de cualquier residuo de corte.

**2**

**3**

- 5** Place the ferrule on the flexible hose in such a way that the tooth comes contact with the end of the hose that has been cut.  
Coloque el ferrul en la manguera flexible de tal manera que los dientes hagan contacto con la punta de la manguera que ha sido cortada.

## ASSEMBLING INSTRUCTIONS - REFRISTAR PROCEDURE

**6** Lubricate the end of the coupling joint with the same oil used in the air conditioning system.  
Lubrique la punta del racor con el mismo aceite usado en el sistema de aire acondicionado.

**7** Find the correct orientation and insert completely the fitting into the hose.  
Encuentre la orientación correcta e inserte completamente el racor en la manguera.

**8** Set up the crimping machine selecting the dieset that is closed to the dimension specified. Crimp to the specified diameter. Ensure the dies fully covers the ferrule length.  
Acondicione la máquina crimpadora seleccionando el conjunto de dados que más se acerque a la dimensión especificada. Crimpe al diámetro especificado. Asegúrese que los dados cubran totalmente la longitud del ferrul.

**9** Inspect the crimping dimension using a calibrated vernier. Check the diameter at the centre of the ferrule following the values on the table b.  
Inspeccione la dimensión de crimpado usando un vernier calibrado. Verifique el diámetro en el centro del ferrul siguiendo los valores de la tabla b.

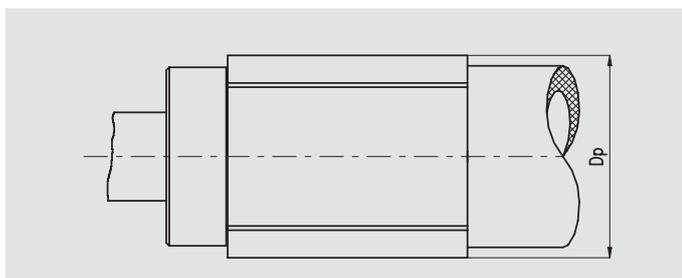

Table b / Tabla b

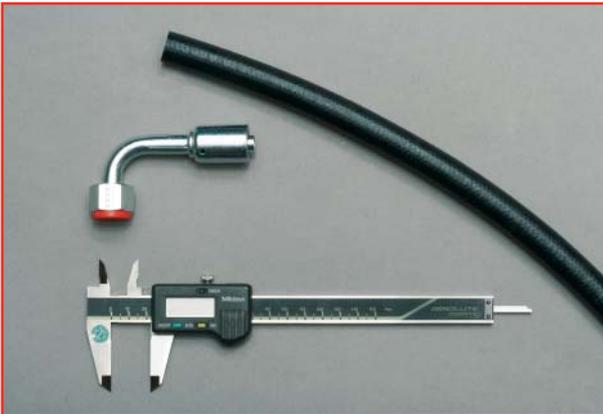

HOSE SIZE			Dp (± 0,1 mm)
DN	Dash	Inch	mm
5	- 04	3/16"	15,2

22	- 16	7/8"	34,4
28	- 20	1.1/8"	42,5

## ASSEMBLING INSTRUCTIONS - REFRIFAST PROCEDURE

**NEW**

### REFRIFAST WITH ONE-PIECE CRIMPED FITTINGS REFRIFAST CON RACOR PRENSADO EN UNA PIEZA

The fitting operations are extremely simple, and consist of the following procedures:  
El montaje es extremadamente simple y consiste en los siguientes procedimientos:

- 1** Check the dimensions of the components.  
Compruebe las dimensiones de los componentes.

- 2** Cut the end of the hose in a perpendicular direction, using the manual cutter.  
Corte la manguera en dirección perpendicular, usando el cortador manual.

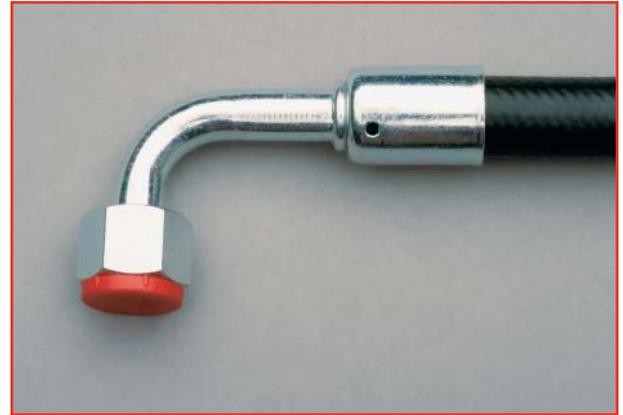

- 3** Verify the end of the hose to be cut in a perpendicular direction.  
Verifique que la manguera ha sido cortada en dirección perpendicular.

- 4** Lubricate the end of the coupling joint with the same oil used in the air conditioning system.  
Lubrique los extremos (mangueras y racores) con el mismo aceite usado en el sistema del aire acondicionado.

## ASSEMBLING INSTRUCTIONS - REFRIFAST PROCEDURE

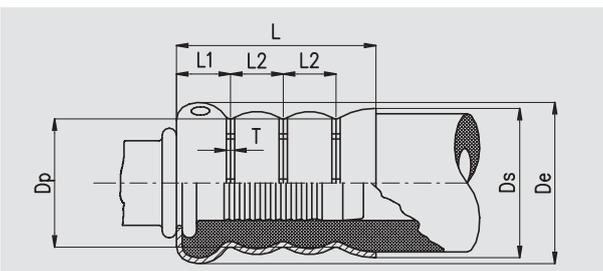

**5** Find the correct orientation and insert completely the fitting into the hose.  
 Compruebe la orientación correcta e inserte completamente el racor en la manguera.

**6** Check the correct position of the hose through the proper hole in the ferrule.  
 Compruebe la correcta posición de la manguera a través del orificio en el casquillo.

**7** Set up the crimping machine selecting the die set that is closed to the dimension specified diameter. Place the fitting on the proper positioner to ensure that it is in the correct position (table c).  
 Prepara la máquina seleccionando las mordazas adecuadas para prensar el diámetro especificado. Ponga el racor en la máquina y verifique que está en la posición correcta (tabla c).

**8** Inspect the crimping dimension using the proper calibrated vernier. Check the dimensions following the values in table c.  
 Inspeccione el diámetro de prensado usando el nonio el calibrado apropiado. Compruebe las dimensiones que siguiendo los valores en la tabla c.

### KEY PERFORMANCE CARACTERISTICAS ESPECIALES

**Universal hose, compatible with the most common refrigerants and compressor lubricants • Low permeability to refrigerant fluid • Compact dimensions • Low weight and high flexibility • Low noise transmission • Field attachable and crimped solutions available with Frigoclic<sup>®</sup> insert**

**Manguera universal, compatible con los mas comunes refrigerantes y lubricantes para compresores • Baja permeabilidad al fluido refrigerante • Dimensiones compactas • Bajo peso, alta flexibilidad • Baja transmisión de ruido • Gama de racores integrados con inserto Frigoclic<sup>®</sup> estandarizado**

#### SPECIFICATIONS: SAE J2064 Type E Class 1

MAIN APPLICATIONS: mobile refrigeration and air conditioning systems: bus, off highway equipment

#### CONSTRUCTION:

TUBE: high temperature resistant thermoplastic (PA) veneer

REINFORCEMENT: one textile braid

COVER: high temperature and environmental resistant synthetic rubber (EPDM)

REFRIGERANTS: compatibility with a wide range of refrigerants (eg. R134a, R404A, R407C)

LUBRICANTS: compatibility with the most common compressor lubricants (e.g. PAG, POE, Mineral Oils)

#### CONTINUOUS WORKING TEMPERATURE:

-40°C / +125°C -40°F / +257°F

MAX. PEAK TEMPERATURE: +140°C +284°F

#### ESPECIFICACIONES: SAE J2064 Tipo E Clase 1

PRINCIPALES APLICACIONES: refrigeración móvil y sistemas de aire acondicionado en: bus, equipo fuera de carretera

#### CONSTRUCCION:

TUBO: termoplástico resistente a las altas temperaturas (PA)

REFUERZO: una trenza textil

CUBIERTA: caucho sintético resistente a las altas temperaturas y al ambiente (EPDM)

REFRIGERANTES: compatibilidad con un amplio rango de refrigerantes (ej. R134a, R404A, R407C)

LUBRICANTES: compatibilidad con los lubricantes de compresores más comunes (ej. PAG, POE, Aceites Minerales)

#### TEMPERATURA DE TRABAJO CONTINUO:

-40°C / +125°C -40°F / +257°F

PICO MAXIMO DE TEMPERATURA: +140°C +284°F

#### Standard Packaging: wrapped coil

For information about alternative carton reel packagings, please visit Manuli web site or contact Manuli Sales Representatives.

#### Embalaje estándar: rollo envuelto

Para información sobre la alternativa de bobina de cartón, por favor visite la web de Manuli o contacte con el Representante Manuli.

### KEY PERFORMANCE CARACTERISTICAS ESPECIALES

**Higher compact dimensions within type A hoses and outside diameter comparable with reduced barrier hoses • Easy installation in space constraints • High flexibility and low bend radius • Compatible with a wide range of refrigerants and lubricants • Low refrigerants permeability and moisture ingress**

Superior dimensión compacta en la manguera tipo A y diámetro exterior comparable con las mangueras compactas "barrier" • Fácil instalación en espacios reducidos • Alta flexibilidad y radio de curvatura • Compatible con una gama amplia de refrigerantes y lubricantes • Baja permeabilidad al refrigerante y al incremento de humedad

Specifications: SAE J2064 Type A Class 1

MAIN APPLICATIONS: off-highway vehicles, small/medium busses and special vehicles such as recreation vehicles, ambulances and military vehicles.

CONSTRUCTION:

TUBE: low refrigerant fluid permeability and wide compatibility with the most common compressor lubricant (IIR)

REINFORCEMENT: one textile braid

COVER: high temperature (max 125°C) and environmental (ozone resistance) resistant synthetic rubber (EPDM)

REFRIGERANTS: compatibility with a wide range of refrigerants, such as R134a, 404A, 407C

LUBRICANTS: compatibility with the most common compressor lubricants, such as PAG, POE and mineral oils

CONTINUOUS WORKING TEMPERATURE

-40°C / +125°C • -40°F / +257°F

ESPECIFICACIONES: SAE J2064 Tipo A Clase 1

APLICACIONES PRINCIPALES: vehículos en carretera, vehículos de recreación y especiales como ambulancias, buses, vehículos del ejército.

CONSTRUCCIÓN:

TUBO: Baja permeabilidad al refrigerante y compatible con el lubricante más común del compresor (IIR)

REFUERZO: una trenza textil

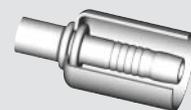

CUBIERTA: alta temperatura (max 125°C) y medioambiental (resistente al ozono). Caucho sintético resistente (EPDM)

REFRIGERANTE: compatible con una gama amplia de refrigerantes, como R134a, 404A, 407C,

LUBRICANTES: compatibilidad con el lubricante más común del compresor, como PAG, POE y aceites minerales.

TEMPERATURA DE TRABAJO CONTINUO:

-40°C / +125°C • -40°F / +257°F

HOSE SIZE			FERRULE EXTERNAL DIAMETER
DN	DASH	INCH	mm
8	- 06	5/16"	22,0
10	- 08	13/32"	22,0
12	- 10	1/2"	25,8
16	- 12	5/8"	28,4

**WARNING:** Ask MRI about other refrigerants and lubricants

**PRECAUCION:** Pregunte a MRI acerca de otros refrigerantes y lubricantes

**Standard Packaging:** carton reel

**Embalaje estándar:** bobina de cartón

**NOTE:** Guaranteed performance only with our fittings.

Comportamiento garantizado solamente con nuestras conexiones.

- 6 Low Pressure charge valve / Válvula de carga de baja presión

## FITTINGS - PART NUMBERING SYSTEM

### PRIORITY OF THE TAILS FOR "HOSE TO HOSE" CONNECTORS

#### PRIORIDAD DE LAS TERMINALES PARA CONECTORES "MANGUERA A MANGUERA"

##### Double connectors

One tail takes priority respect to the other tail (different family) following this order:

- ONE PIECE tail → refer to ONE PIECE CODING
- REUSABLE tail → refer to REUSABLE CODING
- FRIGOCLIC® tail → refer to TWO PIECES CODING
- STAR-CRIMP tail → refer to TWO PIECES CODING

##### Conectores dobles

Un terminal tiene prioridad respecto al otro (familia diferente) siguiendo este orden:

- Terminal ONE PIECE → se refiere a CODIFICACION UNA PIEZA
- Terminal REUSABLE → se refiere a CODIFICACION REUSABLE
- Terminal FRIGOCLIC® → se refiere a CODIFICACION DE DOS PIEZAS
- Terminal STAR-CRIMP → se refiere a CODIFICACION DE DOS PIEZAS

### RULES FOR THE SIZE INDICATION IN THE HOSE TO HOSE CONNECTORS

#### REGLAS PARA LA INDICACIÓN DEL TAMAÑO EN LOS CONECTORES MANGUERA A MANGUERA

In the double connectors, when the tails are part of the same family, the first size is the smallest. If the tails have the same size, this is repeated two times.

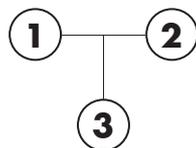

In the double connectors, when the tails are part of different families, the size sequence is the same of the tails sequence (the first size indicates the first tail, the second size indicates the second tail).

In the 3-ways connectors, tails in position "1" and "2" must be part of the same family. All the sizes are indicated following this order:

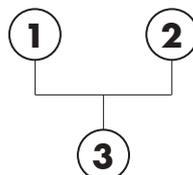

En los conectores dobles, cuando los terminales son parte de la misma familia, el primer tamaño es el más pequeño. Si las terminales tienen el mismo tamaño, esto se repite dos veces.

En los conectores dobles, cuando las terminales son parte de familias diferentes, la secuencia de tamaño es la misma de la secuencia de las terminales (el primer tamaño indica la primera Terminal, el Segundo tamaño indica la segunda terminal).

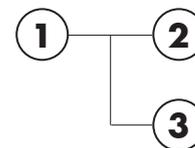

En los conectores de 3 vías, las terminales en la posición "1" y "2" deben ser parte de la misma familia. Todos los tamaños están indicados siguiendo este orden:

**"T"**  
configuration  
configuración

**"Y"**  
configuration  
configuración

**"h"**  
configuration  
configuración

## FITTINGS - PART NUMBERING SYSTEM

### TERMINATION ENDS TYPE

DIGIT	DESCRIPTION / DESCRIPCIÓN
00	<b>Double connector (same tail in two-ends connectors) / No end (plug)</b> Conector doble (mismo terminal en los conectores de dos puntas) / No final (tapón)
10	<b>Metric Thread (60° cone superlight)</b> Rosca métrico (asiento a 60° cono super ligero)
11	<b>Male Metric Thread (24° cone light type)</b> Rosca métrico macho (asiento a 24° super ligero)
15	<b>Female Metric Thread (24° cone O-ring light type)</b> Rosca métrico hembra (asiento a 24° tipo O-ring ligero)
24	<b>ORFS type</b> Tipo ORFS
25	<b>JIC Thread (37° cone)</b> Rosca JIC (asiento a 37°)
26	<b>SAE Thread (45° cone)</b> Rosca SAE (asiento a 45°)
27	<b>JIC Thread double exag. 37° cone / ORFS type Bulkhead</b> Rosca JIC doble hexágono 37° / tipo ORFS con manparó
37	<b>Flange (A/C and Refri application)</b> Flange (aplicación en aire acondicionado y refrigeración)
76	<b>Expansion valve (A/C and Refri application)</b> Válvula de expansión (aplicación en aire acondicionado y refrigeración)
79	<b>Female O-ring and Fixed male O-ring seat (A/C and Refri application)</b> O-ring hembra y asiento fijo O-ring macho (aplicación en aire acondicionado y refrigeración)
80	<b>Male Swivel O-ring (A/C and Refri application)</b> Macho giratorio con O-ring (aplicación en aire acondicionado y refrigeración)

### "HOSE TO HOSE" CONNECTORS / CONECTORES "MANGUERA A MANGUERA"

C1	<b>"STAR-CRIMP" tail (A/C and Refri application)</b> Terminal STAR-CRIP (aplicación en aire acondicionado y refrigeración)
C3	<b>"FRIGOCLIC®" tail (A/C and Refri application)</b> Terminal FRIGOCLIC® (aplicación en aire acondicionado y refrigeración)
K3	<b>"REUSABLE" tail (A/C and Refri application)</b> Terminal REUSABLE (aplicación en aire acondicionado y refrigeración)

### FITTINGS - PART NUMBERING SYSTEM – SPECIAL SUFFIX

The special suffix allows the identification of special features not included in the standard coding and must be placed at the end of the code.

El sufijo especial permite la identificación de aditamentos especiales no incluidos en la codificación estándar y debe estar colocado al final del código.

#### SPECIAL SUFFIX SUFIJO ESPECIAL

- (0) (0) (0)** DROP OF THE ELBOW (in mm)  
LONGITUD DEL CODO (en mm)
- (S) (C)** SOLID CONE (for special termination ends generally supplied with O-ring)  
ASIENTO SOLIDO (para terminal especial generalmente suministrado con O-ring)
- (Q)** SPECIAL QUADRING GASKET (only refrigeration)

### SIZE DETERMINATION

### DETERMINACIÓN DEL TAMAÑO

The first two digits identify the connection size, the second two digits identify the flexible hose size.

Los primeros dos dígitos identifican el tamaño de la conexión, los segundos dos dígitos identifican el tamaño de la manguera flexible.

### CONNECTION SIZE TAMAÑO DE LA CONEXION
